Solidarity Message of the European Regional Office of WFTU with the struggles FNIC CGT France.

, 17/05/2016

The European Regional Office of WFTU expresses its class solidarity and support to the mobilizations organized by FNIC CGT France against the KHOMRI Law.

The government and the employers present the introduction of the KHOMRI Law as the solution to the unemployment. But in reality the law is made against the workers and the destruction of collective agreements and for the increase in multinational's profits.

Workers in every country in Europe are facing the brutal attacks of the monopolies and the EU against their rights.

In the current tough conditions the issue of supporting and expressing class solidarity with the daily struggles being waged against the policies of exploitation and subordination has never been so imperative.

We assure you again that we stand in solidarity with your daily struggles
