# USB expresses a strong solidarity to the Portogues transportation workers. It's a common struggle against a common enemy

Roma, 09/05/2016

The USB greets colleagues and comrades EMEF and of the other Portuguese transport companies, which these days will descend on strike to defend the national contract, employment, wages, payment of overtime, for the safety of workers and against the extension of the fact of the working day.

We express you our deepest support, starting from our workplaces that today see us engaged in hard disputes and conflicts against the wild privatization of public services; At this time in Rome the local public transport workers, already attacked by these policies, are fighting to get the payment of salaries who do not receive for months.

Thursday 12 may , will be the turn of Meridiana airline workers that will mobilize against 900 layoffs at national level.

We are on your side in the common struggle to defend the rights and dignity of workers, against privatization policies, which attack the wage earners and the right of the popular sectors to enjoy the public services.
